cammsproject

The simple way to manage
Projects and Portfolios

Project management software your staff will actually want to use, for projects big and small.

Flexible
Configure workflows and templates to suit how you want to run your projects – whether they're big or small

Collaborative
Achieve faster and clearer communication by chatting to your team in our Hub

Save time
Rank projects, assign tasks and allocate resources all in the one system – and use timelines and Gantt charts to track progress

Accessible
Manage teams on-the-go anytime, anywhere with our mobile and tablet apps

Best practice
Our software complies with ISO 21500:2012 Standard, PMBoK and Agile Project Management frameworks and PRINCE2, Scrum and LEAN methodologies

Affordable
Four pricing tiers, so you can choose only what your business needs

"We were looking for a centralized information management system, from which we can extract both operational and financial data, providing a single version of the truth for both our headquarters and field-based teams."

Mick Darby,
Mines Advisory Group,
UK

Save time and money using cammsproject
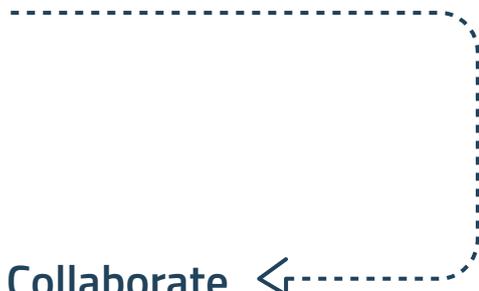

Organize

Our flexible workflows mean you can deal with all kinds of projects, big and small, in the one system. It's quick and easy to organize a project the way you want to manage it - we'll help you break down large goals into bite-size, manageable pieces.

Prioritize

Project and portfolio management could not be simpler. With everything linked to your corporate goals, we make it easy for you to decide which tasks need your resources most. Track all projects and their progress with our Gantt charts, a visual schedule which will also help you plan ahead.

Collaborate

Communicate with members of your team in real time – whether they're in the same office or the other side of the world – via our chat function. This keeps all your communication in one spot, cutting down the number of meetings you need and emails you receive. You can also monitor the latest actions from your team with our live activity stream.

Manage risks

If you're a good project manager, you'll also need to manage your project's risks. But don't worry, we make this step simple. Identify risks when you create a project, and then easily monitor and treat them throughout its life cycle, all within the one system.

Report

It's no longer a headache to get the insights you need to run your organization effectively. Generate reports and dashboards it used to take hours to collate, all with just a click of a button. Need to report on what your team achieved last month? No problem. You can get an overarching view in no time at all.

Leading teams choose cammsproject

From Australia and New Zealand, to the UK and North America, we've successfully helped dozens of organizations to manage projects and portfolios.

Our clients come from a diverse range of industries.

Health

Government

Emergency Services

NGOs

Private Sector

"It offers a seamless approach to project management with linkages to finance – from task up to vision – which was what we were after."

Kurt Abbot,
Waikato District Council,
NZ

GREATER SHEPPARTON

"With the cammsproject solution in place within the organization, we have increased the efficiency of our project management processes, whilst effectively managing our projects and programs from the Capital Bid stage through to implementation and project closure."

James Nolan ,
Greater Shepparton City Council,
Australia
