

The simple way to manage **Risks, Hazards, Incidents, Audits and Compliance**

An Enterprise Risk Management platform your staff will actually want to use, combining all your Governance, Risk and Compliance needs.

Why CAMMS?

With over 20 years' experience in Enterprise Risk Management (ERM), we have the expertise, resources and experience to meet your unique risk mitigation objectives.

Recognised as a Cool Vendor in ERM software by global analyst firm Gartner and consistently been recognised as a 'High Performer' among the world's best Governance, Risk and Compliance (GRC) platforms by G2 Crowd, the world's leading business solutions review website CAMMS has offices in the UK, North America, Asia, Australia and New Zealand.

Why leading teams trust cammsrisk?

Easy to use

Simple dashboards and pre-configured risk, incident, hazard and compliance management templates, mean you'll be on your way in no time

Recognised

We were named in Gartner's 2015 Cool Vendors in Risk Management report and we appeared twice in year 2018 in G2 Crowd's Grid for GRC software

Best practice

Our software complies with international standards such as ISO 31000:2009 and the COSO framework

Affordable

Our solution is available across four pricing tiers, so you can choose only what your business needs

Accessible

Manage risks, incident and compliance obligations on the go – anywhere, any time – with our mobile and tablet apps

Integrated

Align Risk Management to your organisation's strategy and source data from your existing systems in real time thanks to our world class integration capability

cammsrisk has all your needs covered

Risks

Effective Risk Management and success go hand-in-hand – it's tough to have one without the other. We'll help you make Risk Management part of your organisational culture, so you can identify, track and manage risks with confidence. cammsrisk can also help you define your risk appetite and ensure your mitigation plans are well on track.

And, you can't effectively manage your risk exposure without appropriate links to strategic planning. That's why we've designed our software so it can align seamlessly with your organisation's corporate plan.

Incidents

It's important every organisation manages the events in which losses, damages and injuries can occur.

cammsincident allows you to report actual incidents and near misses as they occur, conduct investigations, determine their impact and monitor them until the case is closed. We make it easy for your organisation to learn from experience.

Hazards

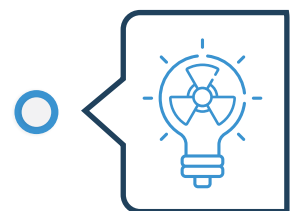

Trying to manage hazards manually or using an in-house tool? We offer a much faster, simpler way.

cammshazard will help you identify hazards, evaluate their risk, and monitor them so they don't become a problem. In short, we'll help you ensure workplace health and safety.

Audit

We live in a world of process and compliance. cammsaudit helps you schedule and manage internal and external audits, along with the associated findings and recommendations.

Plus, everything's easily traceable, with all data recorded and date stamped.

Compliance

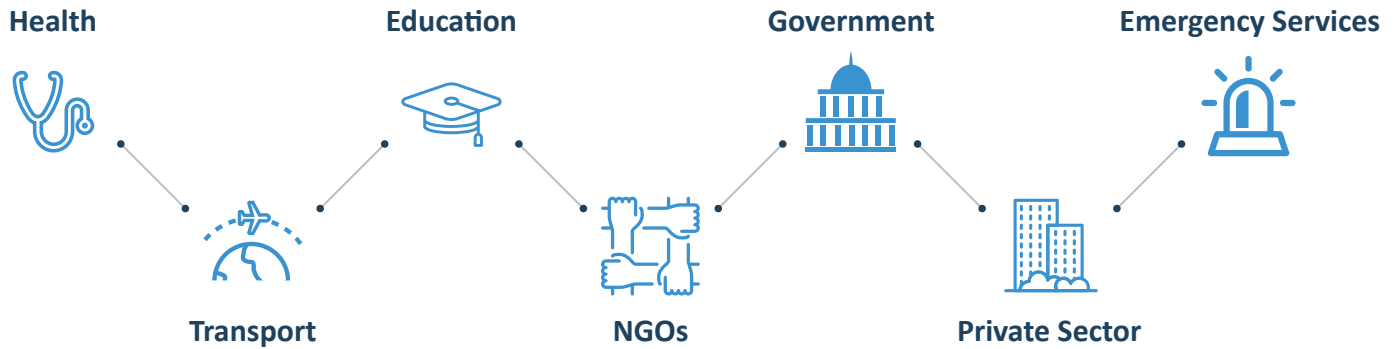

Are you struggling to keep on top of your regulatory compliance obligations? This is a common challenge in the modern business landscape, with the proliferation of legislation and policy development. cammscompliance is designed to facilitate a cultural change within your organisation when it comes to the management of legislative and regulatory compliance obligations.

In addition, the tool's compliance management functionality is built in a super flexible manner to allow your organisation adjust the software to suit with changing business needs.

Leading teams choose cammsrisk

Our ERM software is universally recognised. With tens of thousands of users across five continents, CAMMS delivers GRC solutions to government, private and public organisations throughout a range of industries.

“It’s a visually appealing, powerful display mechanism that enables our board, our residents and our stakeholders to hold us to account for what we are doing.”

Robert Ford,

Dorset and Wiltshire Fire and Rescue Service, UK

“I would have no hesitation in recommending cammsrisk to any business who is looking to implement not just a system but a cultural enabler for change as to how businesses approach Risk Management.”

Scott Williams,

North Eastern Community Hospital, Australia

“With cammsrisk, we can easily manage strategic and operational risks across all 13 venues we look after on behalf of the WA Government.”

John Sawka,

VenuesWest, Australia
